Education

Indian Institute of Information Technology, Kota
B.Tech in Computer Science and Engineering

Aug 2023 – May 2027
GPA: 8.58/10

Work Experience

GrowthSutra LLP

May 2025 – July 2025

Generative AI Intern

- Designed and deployed a production-grade **AI-powered Sales Proposal Generation Platform**, reducing manual effort by **80%** and accelerating proposal turnaround time by **92%** (from 2 hours to 9 minutes).
- Engineered a multi-agent workflow using **LangChain**, **LangGraph**, and **Google ADK**, implemented with **Crawl4AI** for sub-**7-second** AI-driven web scraping and a **RAG pipeline** to interpret client requirement files, achieving **90% automation coverage** with **real-time document intelligence**.
- Deployed the platform on **GCP**, configuring **secure authentication**, load balancing, and scalable cloud resources to support multi-user access with robust performance and reliability.

KeyStride

Aug 2025 – Present

Software Development Intern (SDE)

- Developed and optimized an **Electronic Data Interchange (EDI) system**, handling **multiple data parsers** and complex database operations, improving data processing speed by **65%**.
- Implemented robust database workflows and automated error-handling pipelines, reducing manual intervention by **70%** and supporting **>1M transactions/month** efficiently.
- Collaborated in a **cross-functional Agile team**, managing sprints, tasks, and deadlines to ensure timely delivery of high-quality software features.
- Integrated APIs and modular data pipelines, enhancing system scalability and reducing data latency to under **2 seconds per transaction**.

Projects

Harini: Intelligent AI Scheduling Agent

[\[GitHub \]](#) [\[Demo \]](#)

- Built a fully autonomous **AI scheduling agent** using **LangChain**, **LangGraph**, and **Composio**, automating **calendar booking**, **meetings**, and **follow-ups** with a **90% time reduction**.
- Containerized via **Docker** on **LangGraph Studio**, enabling **scalable orchestration** of **LLM agents**, **APIs**, and **pipelines** with **<2s latency**.

AI Interviewer: Autonomous AI Interview Agent

[\[GitHub \]](#)

- Developed an autonomous voice-based interview agent with **LangChain** and **LangGraph**, cutting manual evaluation by **85%**.
- Integrated **STT/TTS** and **ReAct-style logic** to generate context-aware AI reports with **91.4% accuracy**, supporting **scalable candidate assessment**.

Technical Proficiencies

Programming Languages: Java, Python, C++

Deep Learning: PyTorch, TensorFlow; Hugging Face, Natural Language processing, Computer Vision

Generative & Agentic AI: LangChain, LangGraph OpenAI, Groq, and Anthropic

Backend Development: Java, Spring Boot, Spring MVC, Spring REST FastAPI and Docker

Database Management: MySQL, SQL, ChromaDB, FAISS — Relational and vector databases

Achievements and Skills

- Led my team to **2nd Runner-Up** at **VisionX AI Hackathon**, DTU (Feb 2025) and guided teams in **8+ national-level hackathons**, demonstrating strong leadership and project execution skills.
- Codeforces Rating:** 1042, solved **500+ problems**, demonstrating strong algorithmic and problem-solving skills.
